PRESENTS

CELL PHONE FORENSICS & MOBILE SPYWARE TRAINING FEBRUARY 18-19, 2010

This 16 Hour workshop includes 2 days of instruction and hands-on lab work with actual cell phones. Mobile Forensics topics that will be covered include: Acquisition, Preservation, Analysis and Presentation of CDMA, GSM, and iDEN cell phones, SIM Cards, Search Warrants, and applicable Laws. Mobile Spyware topics include: Identification, Preservation, Processing, Eradication and applicable Laws.

At the conclusion of each day, students will have a strong fundamental knowledge of cell phone forensics and mobile spyware identification. They will also have the ability to acquire, preserve, analyze and present data and spyware from various models of Cell Phones, SIM Cards, and Memory Cards specific to mobile devices!

TRAINING OVERVIEW:

Day One:

Cellular Network Technologies/Core Software Utilization:
Investigator Tools, Call Detail Records, Logical and Physical Dumps, Networks, Actual use of supplied Forensic Software and Hands On Acquisitions from Cell Phones, SIM Cards and Memory Cards

Day Two:

Mobile Spyware Discovery and Eradication:
Mobile Spyware demonstrated and identified, hands on use of supplied forensic software to locate and reveal hidden "bugs", and eradication techniques

Course Requirements:

For the duration of the workshop, participants must have: a laptop with Windows XP SP2, Admin Access and USB ports.

Who Should Attend:

Law Enforcement, Corrections, Military, Computer Forensics Specialists, Private Investigators, IT Security Specialists, TSCM, Bank Security and Insurance Adjusters.

Attendees Will Receive:

- Cell Phone Forensic Hardware & Software
 - Data Pilot Universal Kit
 - SIM Card Reader
 - Paraben Device Seizure
- Mobile Spyware Discovery Software
- Mobile Spyware Text Book and Training Manual
- Certificate for CEU Credits
(these classes have been approved for continuing education by the South Carolina Law Enforcement Division)

...AND MORE!

Thomas J. Slovanski, Instructor

As the owner of the first private mobile forensics lab in South Carolina, former police detective Tom Slovanski is dedicated to the continuing education of investigative professionals in mobile forensic investigations. Tom is also the first to offer a stand alone class on *Mobile Spyware Discovery*. In addition, Tom is licensed and certified by the SC State Police (SLED PDC2073) to train police and other investigative professionals on Mobile Forensic Data Recovery and Mobile Spyware.
